Fund Overview

The Equitable Life Active Balanced Portfolio Select will actively manage allocations between multiple asset classes based on the relative attractiveness of each category based on market conditions and the portfolio manager's expectations for that asset class. The portfolio manager may use a combination of fundamental and technical analysis in addition to quantitative measurements to establish the positioning bias of the fund. Exposures to particular asset classes will be achieved primarily through the use of exchange traded funds where a suitable vehicle is available.

The objective of the fund seeks long-term capital appreciation and income by investing in a diversified portfolio comprised primarily of fixed income, equity and real estate related investments. The portfolio, at times, may assume limited exposures to commodity related investments or other alternative asset classes.

We are providing this information to you for general information purposes only.

* Underlying mutual fund's investor series performance shown for illustration purposes only. Actual segregated fund performance will vary.

Equitable Life of Canada and its representatives have no control over the function or design of the software which has assembled these reports and they may not contain accurate or current unit values. Returns under 1 year are simple rates of return. All others are annual compound rates of return. All returns are calculated after taking expenses, management and administration fees into account.

Important information about Equitable Life's segregated funds is found in the Information Folder, available from your Advisor.

ANY AMOUNT THAT IS ALLOCATED TO A SEGREGATED FUND IS INVESTED AT THE RISK OF THE OWNER AND MAY INCREASE OR DECREASE IN VALUE.
